

COVID 19

Workplace Preparedness

ARE YOU READY?

WE ARE HERE TO HELP!!

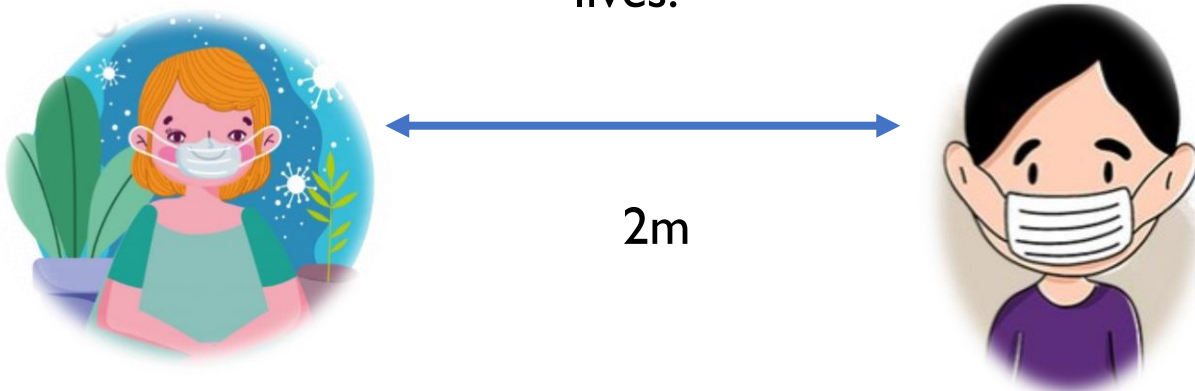

COVID 19

As you know, the coronavirus is passed from person to person in small droplets from the nose and mouth that can be transmitted by direct contact, on surfaces we touch or when an infected person coughs or sneezes when they are close to another person.

Most infected people exhibit only mild symptoms; some do not show any symptoms at all.

It is therefore critical, that companies prepare the workplace as the country resume economic activity to contain the virus in the workplace and therefor save lives.

WE SUPPORT SMALL BUSINESSES

The following product has been developed to assist you in re-opening your workplace to ensure social distancing, hygiene and the use of appropriate PPE.

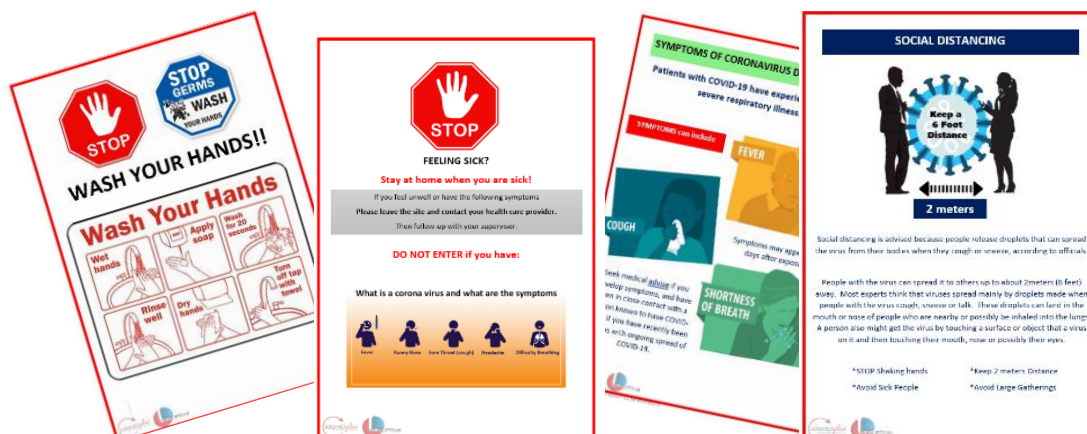

We will guide you all the way
